ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: A POSTCARD WITH SOUND RECORDING AND A PLAYER THEREFOR

(57) Abstract: A postcard with sound recording and a player therefor allows discrete, even multiple sending of a content and listening to the content via an adequate player and a security pin. The postcard of the invention is made as an optional postcard (1), one side of which is optionally graphically designed, for instance bearing a photo, and on the other side there is a field for an address and a message field, where an electronic device (2) is placed, which is intended to receive, store and transmit a voice message and consists of a microphone, a processing unit, a memory unit and a power source, e.g. a battery, whereby the electronic device (2) is linked to a manual switch (3) for message recording and a pin (4) that is also linked to

a sound player (5) and a set of switches (6) for the entry of a security pin into the electronic device (2), whereas the entered security pin is simultaneously also the key for transmission of the sound recording in the player (5), whereas switches (3 and 6) as well as the microphone of the electronic device are covered each by two sheets, namely a directly accessible sheet (7) and a security sheet (8) lying underneath the sheet (7), said sheet (8) being replaceable.
